Spectroscopy and Machine Learning

Changing the way the world inspects and detects

Just take a picture

**3 Partners
building a
solution
that
combines:**

- **Hardware manufacturer or supplier - multispectral camera or spectrometer or ultrasound etc. Monetize the hardware.**
- **Domain expertise, with a clear understanding of the business problem. Has software that engages the end user. Monetize the solution.**
- **Machine Learning experts with an existing platform so we can test quickly. Then build & integrate via an API and monetize the model. (Stream)**
