

TICEM Advanced Structural Technologies

Dr. Bekir Y. Pekmezci

OUR BRANDS

TICEM Labs

ISO 17025 Accredited Testing
Laboratories

Regeneration of concrete

Cement Based Panel Production

GRC, Textile Reinforced, UHPC
Facade Panels

ADVANCED STRUCTURAL TECHNOLOGIES

ticm

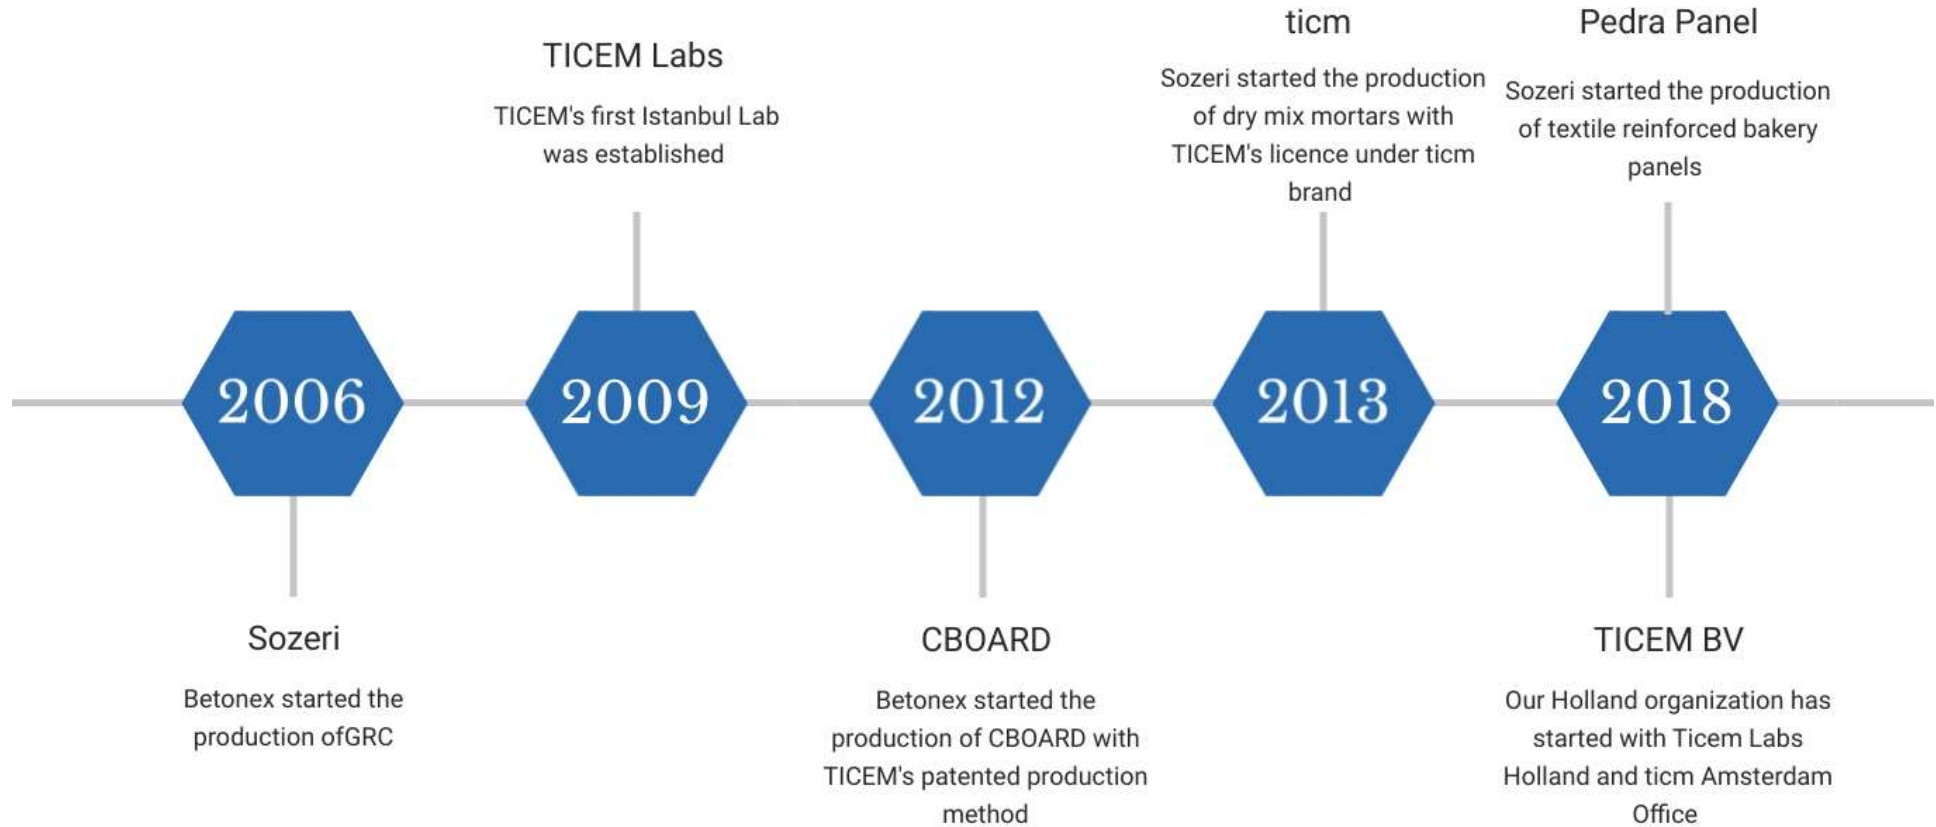

Concrete and Masonry Repair
and Strengthening Products

Pedra Panel

Baking Panels for Ovens

MILESTONES

LOCATIONS

TICEM Labs / Istanbul and Ankara

ticm / Betonex / Pedra Panel
Factory Complex

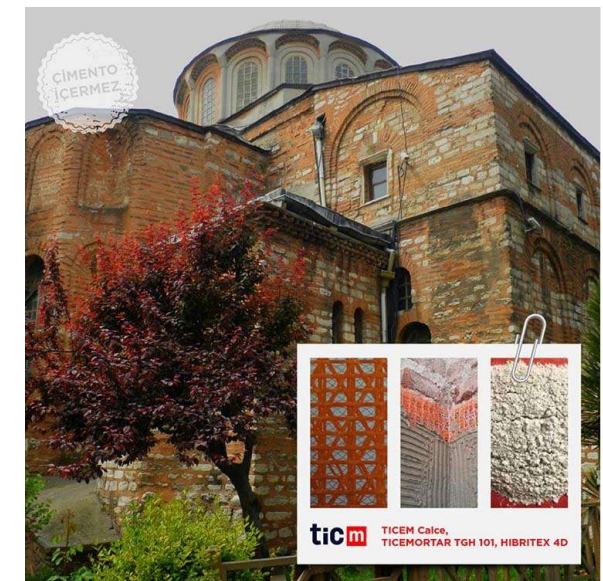

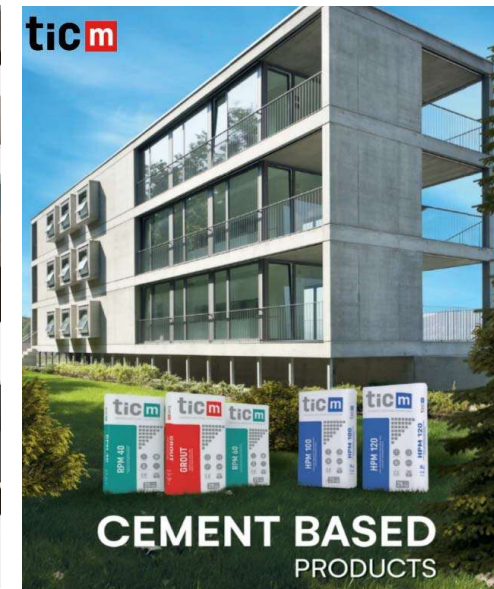

TICEM Labs / Ede

ticm / Amsterdam Office

Sustainable buildings for sustainable future

Current Projects

- Development and production of heat storing building elements by utilization of phase change materials
- Development and production of earthquake resistant 3D printed buildings.
- Development and production of high performance and smart building materials for monitoring of structures in smart cities.
- Development fabric reinforced cementitious matrices for sustainable repair and strengthening of strategic structures
- Development of an optimization technique for facade stone cleaning of heritage structures.
