Polymer-based products by (micro-)molding

Requirements in (micro-)molding

- accuracy / reliability
- personalization / small series
- micro-details
- high surface quality
- ultra-short lead time
- low cost
- transferability

Application domains:

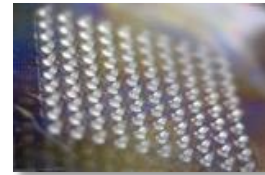

- optics
- mechanics
- packaging
- fluidics...

Polymer-based products by (micro-)molding

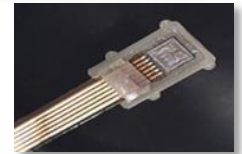

Requirements in (micro-)molding

- accuracy / reliability
- **personalization / small series**
- micro-details
- **high surface quality**
- **ultra-short lead time**
- **low cost**
- transferability

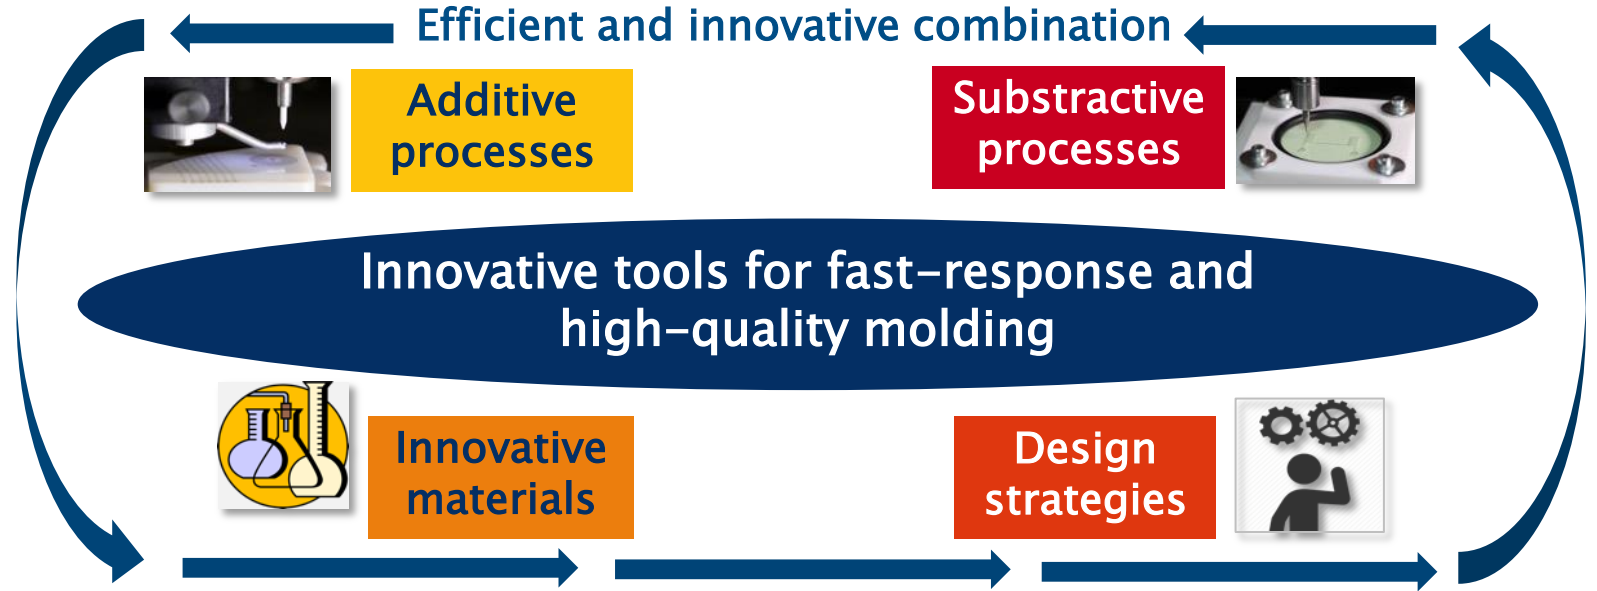

Application domains:

- optics
- mechanics
- packaging
- fluidics...

**Innovative tools for fast-response and
high-quality molding**

Sirris - Project proposal (CORNET)

Looking for partner with expertise in advanced materials & processes and any other competences in phase with the topic
